

Manufacturer of **Unique** and **Sustainable** Floors

#### Why US FLOORS Cork?

- Lifetime wear/Lifetime Structure Warranty
- "GREEN" – Renewable, Sustainable Mediterranean cork
- Floating floor saves money on prep and installation
- Extremely Durable – used commercially in hospitals and museums, yet comfortable under foot
- Abrasion resistant UV-cured finish
- Excellent thermal insulating properties – offering great thermal and sound reduction
- Naturally resists mold, mildew, and household pests
- Meets or exceeds standards for formaldehyde emissions established by the California Air Resource Board (CARB) – only the highest quality of glues and finishing products used in the production of this floor
- Easy to install, clean, and maintain – simply damp mop or use a wood floor cleaner - no need for wax or polishes
- Coordinating Moldings and trim available
- Contribute to satisfying LEED credits for Rapidly Renewable Resources and Low Emitting Materials under the LEED Rating System

#### Why US FLOORS Bamboo?

- Lifetime Wear/Lifetime Structure Warranty
- 27% harder than oak and 13% harder than maple – Bamboo is harvested at peak maturity ensuring highest quality floor
- Compared to some bamboos on the market, US Floors harvests at 5-7 years in order to maintain a dense floor after installation
- Installed like hardwood
- Aluminum oxide coating, outlasts traditional finishes 3 to 4 times over
- Trendsetting style and superior durability – often seen on all your home improvement shows
- Contribute to satisfying LEED credits for Rapidly Renewable Resources and Low Emitting Materials under the LEED Rating System
